Epic: Fine. We have given the user description, we need to do acceptance criteria, and assign user stories.
Missing points in the project board.

We will start with the external API.

Nathan is not expecint release notes.

By the end of this week, we need release notes for the next meeting.
- Check the guide.
From next week onwards, we need to create a table (Sena's job)
- Marks number of commits
- Need minimum of 4 commits.
- Each of us pick our best commits.
Create 2 folders in submission
- TA meetings
- Team meetings
Divide among ourselves
- UI
- EJS
- Parials
- Node JS server
Rest of group figure out external API

FUnction features:
- While each of us are working on our user stories, merge our code to the main.

For
